

# Akash Sahani

Software Engineer | 2x Adobe Certified Magento Developer

+91 9137690039 | akashsahani2205@gmail.com | <https://linkedin.com/in/itsakashsahani>

---

2x Adobe Certified Expert Magento Developer with 4 years of experience in building scalable, high-performing Magento 2 solutions. Skilled in custom module development, headless architecture, MSI, and third-party integrations. Strong background in AWS, GraphQL, and performance optimization, with a focus on delivering robust and tailored Adobe Commerce experiences.

## WORK EXPERIENCE

### Software Engineer | Indusnet Technologies Pvt Ltd

07/2023 – Present

Remote

- Built and integrated 100+ custom Magento 2 modules, including store locator, jewelry engraving, SMS notification triggers, loyalty program, and multi-lingual support (English/Arabic) — improving site functionality and customer engagement.
- Spearheaded development of Headless Magento projects, increasing platform performance by 30% for over 50,000 SKUs.
- Improved Magento performance by implementing AWS S3 for static file storage, CloudFront caching to speed up content delivery, and CodeDeploy for streamlined deployments, achieving a 20% reduction in site downtime and enhanced load times.
- Optimized Webkul Marketplace customization, improving checkout flows and reducing cart abandonment by 15% for 500+ sellers.
- Used MSI to improve stock accuracy across 20+ warehouses.

### Software Engineer | Ambab Infotech Pvt Ltd

09/2021 – 07/2023

Mumbai, Maharashtra

- Delivered tailored enterprise-level solutions for clients in automotive, beauty, and jewellery sectors.
- Engineered a Quiz-based Product Recommendation system, boosting user engagement by 25% and enhancing customer retention.
- Built a wide range of custom modules including ingredient glossary, sms based authentication, in-store pickup module, checkout customization, enhancing overall customer experience and functionality.
- Integrated ERP systems and designed custom workflows for PLP, PDP, and checkout modules. Designed and implemented secure authentication systems, including SMS login and role-based access controls, securing over 15,000 user accounts and preventing unauthorised access.
- Led development of Warehouse Management features to improve inventory handling and reporting.
